## **DETAILED ACTION**

### ***Remarks***

Upon reconsideration, it is agreed that the prior art of record fails to teach a method for rearranging LEDs such that their characteristic values among the LEDs are equal. It is to be understood from the appellant's argument that the context of "rearranging" involves physical movement of all necessary LEDs in the manner as described in independent claims 1 and 5. The issuance of this Notice of Allowance effectively vacates all rejections mailed ) 7/08/05 and 12/29/05.

### ***Allowable Subject Matter***

1. Claims 1-19 are allowed.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or suggest the combination of the limitations as set forth in the claims: a method of storing characteristic values of each of the LEDs measured in a characteristic measurement; a method of temporarily keeping the LEDs after storing the characteristic values; and a method of rearranging the LEDs to make the characteristic values of adjacent LEDs substantially equal as claimed in independent claims 1,5 and 16.

Claims 2-4, 6-15 and 17-19 are allowed because of their dependency status from independent claims 1 and 5.

Prior art fails to disclose or suggest the combination of the limitations as set forth in the

claims: an arrangement sequence calculation unit that generates an arrangement sequence of the LEDs such that a difference between the characteristic value of adjacent LEDs is minimized; and a rearrangement unit for rearranging the LEDs in accordance with the arrangement sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
